What db_v4 can see

3,744 fungal species with an assembly; 1,595 carry a gene model and can enter the database

- host (plant)
- target: known plant pathogen
- host associate: seen in a phytobiome study
- plant associate: recorded on a plant
- congener: shares a genus with a pathogen
- solid: has a gene model (usable)
- pale: assembly exists, no gene model
